DETAILED ACTION

REJECTIONS WITHDRAWN

The obviousness-type double patenting rejections over U.S. Patent No.
 6,743,523 only set forth in the non-final rejection of 2/22/05, page 7, paragraph 11 have been withdrawn.

REJECTIONS REPEATED

2. All of the 35 USC 103(a) rejections set forth in the non-final rejection of 2/22/05, pages 4-6, paragraphs 6-9 are repeated for the reasons of record. The obviousness-type double patenting rejection over copending Application 09/917,136 set forth in the non-final rejection of 2/22/05, pages 6-8, paragraphs 10 and 12 are repeated for the reasons of record.

NEW REJECTIONS

3. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

4. Applicant's arguments filed 5/23/05 have been carefully considered but are deemed unpersuasive.

Applicant has argued that Rosenbaum and Wilhoit teach away from applicant's invention because applicant claims a 2 component blend containing a single alphaolefin while Rosenbaum teaches a four component blend and Wilhoit teaches a three

Application/Control Number: 09/526,379

Art Unit: 1772

component blend wherein 2 of the 3 components are alpha-olefins. However, applicant's claims are not restricted to two-component blends because applicant uses the term "comprising" and "having" which is open language and does not exclude the inclusion of further components to any of the sidewall films including further alpha-olefins.

Applicant has argued that Rosenbaum discloses that the alpha-olefin component is present in an amount of 25-50% by weight while applicant's claimed range is 55-99% by weight. However, Rosenbaum discloses a range of from 30-60% by weight (see page 10, lines 9-16).

Applicant has argued that Sudo fails to suggest a first component present in an amount of 55-99% and a second component present in an amount of 1-45% by weight. However, Rosenbaum discloses applicant's ranges and Sudo is relied for its teaching cyclic polyolefins.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Applicant has argued that Sudo does not disclose applicant's recited density.

However, a result effective variable, like density, absent clear and convincing evidence of an unexpected result, is obvious and routine to one of ordinary skill in the art through routine experimentation (MPEP 2144). It would have been obvious to one of ordinary

Application/Control Number: 09/526,379 Page 4

Art Unit: 1772

skill in the art to have provided an alpha-olefin with a density of less than 0.915 in order to provide improved physical properties to the polymer blend.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Miggins whose telephone number is 571-272-1494. The examiner can normally be reached on 1:00-10:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
